This has been developed by integrating best practices from international standards including the Committee of Sponsoring Organisations of the Treadway Commission, ISO 31000:2018 and benchmarking industry practices.

The Risk Management Committee ('RMC') of the Board provides an oversight and guides ERM team on risk management policy and deployment. It reviews the status of key risks, progress of ERM implementation across locations and any exceptions flagged on a quarterly basis.

The Risk Appetite, approved by the RMC, has been developed by analysing industry's best practices and aligns to the vision of the Company. This is an important metric and the guiding principle for management of risks, driven by the following:

- › Health and safety of the employees and the communities in which the Company operates are the prime concern and the operating strategy is focused on this objective.

- › All business decisions are aligned to the Tata Code of Conduct.
- › Management actions are focused on continuous improvement.

- › The long-term strategy of the Company is focused on generating profitable growth and sustainable cashflows that creates long-term stakeholder value.

Risk Owners may accept risk exposure to their annual and long-term business plans, which after implementation of mitigation strategies, is aligned to the Company's risk appetite.

The ERM framework is driven across the organisation by the ERM team led by the Chief Risk Officer, who reports to ED & CFO and the RMC Chairperson. The bottom-up ERM process is decentralised to keep the risk ownership with the BUs to drive accountability and ensure agility. This is complemented by a top down process, which helps in identification of strategic enterprise level risks. The ERM team carries out horizon scanning to track the external landscape and organises 'Expert Lens' sessions and webinars for the leadership team and Risk Community to identify emerging risks.

The Company follows coordinated risk assurance through which the ERM process is integrated with Audit, Strategy, Legal & Compliance, and Security functions. Corporate Audit conducts an independent audit of the ERM process deployment across the organisation, as the third line of defence.

enabled 'Horizon Scanning' feature has been launched to scan relevant external risk developments.

Capability development for ERM has been a key focus area across the organisation and various formats of communication & training have been developed, focusing on Risk Champions (Extended arm of ERM Team), risk owners, new joiners and specific functions.

Risk Management has been institutionalised as an additional metric in the performance assessment of Risk Owners and Champions. The Company periodically conducts Risk Maturity Assessments and Risk Culture Survey from independent external assessors to benchmark practices and identify areas of improvement.

Commodity price risk

Coal and other bulk commodities accounted for ~63% of the Company's procurement expenditure. During FY2025-26, steel and its vital raw material viz. metallurgical coal and iron ore, maintained price stability relative to previous years. This was influenced by reduced import volumes from key consuming markets, and a tempered growth in steel production. Ongoing trade tensions and sanctions involving major global players such as the USA, China, Canada, Europe, and Russia introduced market volatility and periodically impacted supply availability. While, Chinese steel prices experienced continued softening, iron ore prices remained stable, receiving minimal uplift from typical seasonal weather-related disruptions or inventory restocking efforts. At the end of FY2025-26, the escalating tensions and direct engagements in the Middle East, primarily involving Israel, Iran, and the USA, posed a significant and immediate threat to global commodity markets. The primary concern is the potential for severe disruption to critical shipping lanes, i.e. the Strait of Hormuz, and direct attacks on regional energy infrastructure.

Tata Steel employs a comprehensive strategy to manage raw material price volatility and enhance supply chain resilience. Advanced commodity price forecasting tools are used for data-driven procurement, optimising purchase timing and inventory. Reverse auctions ensure competitive sourcing for various inputs. Furthermore, the Company diversified coal sourcing beyond Australia to countries like the USA, Canada, Mozambique, and Indonesia, mitigating concentration risk. Domestic sourcing in India from Odisha and Chhattisgarh is also explored for non-coking thermal coal, alongside contracts with local rake suppliers to improve logistics. Indigenisation efforts de-risk the supply chain by empowering local suppliers, and a sustainable procurement framework encourages reduce, recycle, and reuse initiatives with bulk material suppliers.

Additionally, to address the short-term price volatility, the Company also hedges certain commodities in the derivatives market. Exposure of the Company to key commodities throughout the year is given as below:

1. Total exposure of the Company to commodities (including commodities based on materiality): ₹33,471 crore.
2. Exposure to the Company to various commodities (based on materiality)

Commodity Name	Exposure in INR towards the particular commodity (crore)	Exposure in Quantity terms towards the particular commodity (Tonnes)	% of such exposure hedged through commodity derivatives				Total
			Domestic Market		International Market		
			OTC	Exchange	OTC	Exchange

Refractory	1,955	1,87,703	Nil	Nil	Nil	Nil	Nil
Aluminium	1,507	59,738	Nil	Nil	5.8*	Nil	5.8

*hedging started in December 2025.

The Company has adopted a Risk Management policy that strives to anticipate and take preventive action to manage or mitigate risks. The Company has also adopted a Commodity Hedging Policy that takes into account total exposure of the Company towards commodities, commodity risks faced by the entity, hedged exposures, etc. as specified above.
