

- xii. As the Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it, the reporting under clause 3(xii) of the Order is not applicable to the Company.
- xiii. The Company has entered into transactions with related parties in compliance with the provisions of Sections 177 and 188 of the Act. The details of related party transactions have been disclosed in the standalone financial statements as required under Indian Accounting Standard 24 "Related Party Disclosures" specified under Section 133 of the Act.
- xiv. (a) In our opinion, the Company has an internal audit system commensurate with the size and nature of its business.
(b) The reports of the Internal Auditor for the period under audit have been considered by us.
- xv. In our opinion, the Company has not entered into any non-cash transactions with its directors or persons connected with the directors. Accordingly, the reporting on compliance with the provisions of Section 192 of the Act under clause 3(xv) of the Order is not applicable to the Company.
- xvi. (a) The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the reporting under clause 3(xvi)(a) of the Order is not applicable to the Company.
(b) The Company has not conducted non-banking financial /housing finance activities during the year. Accordingly, the reporting under clause 3(xvi)(b) of the Order is not applicable to the Company.
(c) The Company is not a Core Investment Company as defined in the regulations made by the Reserve Bank of India. Accordingly, the additional reporting under clause 3(xvi)(c) of the Order is not applicable to the Company.
- (d) In our opinion, the Group as defined in the Reserve Bank of India (Core Investment Companies) Directions, 2025 has six CICs as part of the Group.
- xvii. The Company has not incurred any cash losses in the financial year or in the immediately preceding financial year.
- xviii. There has been no resignation of the statutory auditors during the year and, accordingly, the reporting under clause 3(xviii) of the Order is not applicable.
- xix. On the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the standalone financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date will get discharged by the Company as and when they fall due.
- xx. As at balance sheet date, the Company does not have any amount remaining unspent under Section 135(5) of the Act. Accordingly, reporting under clause 3(xx) of the Order is not applicable.
- xxi. The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of Standalone Financial Statements. Accordingly, no comment in respect of the said clause has been included in this report.

NOTES

forming part of the standalone financial statements

1. Company Information

Tata Steel Limited ("the Company") is a public limited Company incorporated in India with its registered office in Bombay House 24, Homi Modi Street Fort, Mumbai - 400 001, Maharashtra, India. The Company is listed on the BSE Limited (BSE) and the National Stock Exchange of India Limited (NSE).

The Company has presence across the entire value chain of steel manufacturing from mining and processing iron ore and coal to producing and distributing finished products. The Company offers a broad range of steel products including a portfolio of high value added downstream products such as hot rolled, cold rolled, coated steel, rebars, wire rods, tubes and wires.

The functional and presentation currency of the Company is Indian Rupee ("₹") which is the currency of the primary economic environment in which the Company operates and all the values are rounded off to the nearest two decimal places, unless otherwise indicated.

As on March 31, 2026, Tata Sons Private Limited owns 31.76% of the Ordinary Shares of the Company and has the ability to influence the Company's operations.

The standalone financial statements ('financial statements') for the year ended March 31, 2026 were approved by the Board of Directors and authorised for issue on May 15, 2026.

2. Material accounting policies

The material accounting policies applied by the Company in the preparation of its financial statements are listed below. Such accounting policies have been applied consistently to all the periods presented in these financial statements, unless otherwise indicated.

(a) Statement of compliance

The financial statements have been prepared in accordance with the Indian Accounting Standards (referred to as "Ind AS") prescribed under Section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules, as amended from time to time and other relevant provisions of the Act.

(b) Basis of preparation

The financial statements have been prepared under the historical cost convention with the exception of certain assets and liabilities that are required to be carried at fair value by Ind AS.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle which is based on the nature of businesses and the time elapsed between deployment of resources and the realisation of cash and cash equivalents. The Company has considered an operating cycle of 12 months.

(c) Use of estimates and critical accounting judgements

In the preparation of the financial statements, the Company makes judgements in the application of accounting policies; and estimates and assumptions which affects carrying values of assets and liabilities that are not readily apparent from other sources.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

The Company uses the following critical accounting estimates and judgements in preparation of its financial statements.

Impairment of financial assets (other than subsequent measurement at fair value)

Measurement of impairment of financial assets require use of estimates and judgements, which have been explained in the note on financial instruments under impairment of financial assets. (refer note 2(m), page F36).

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

Useful lives of property, plant and equipment, right-of-use assets and intangible assets

The Company reviews the useful life of property, plant and equipment, right-of-use assets and intangible assets at the end of each reporting period. This reassessment may result in change in depreciation and amortisation expense in future periods. The policy has been detailed out in note 2(e), page F32, note 2(j), page F34 and note 2(k), page F35.

Provisions and contingent liabilities

A provision is recognised when the Company has a present obligation, legal or constructive, as result of a past event and it is probable that the outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. They include provisions on decommissioning, site restoration and environmental provisions as well which may change where changes in estimated reserves affect expectations about the timing or cost of these activities. All provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

The Company uses significant judgements to assess contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past event where it is either not probable that an outflow of resources will be utilised to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognised nor disclosed in the financial statements. Further details are set out in note 19, page F83 and note 34(A), page F101.

Fair value measurements of financial instruments

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including Discounted Cash Flow Model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree

of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risks, credit risks and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Further details are set out in note 37, page F110.

Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116 "Leases". Identification of a lease requires significant judgement in assessing the terms and conditions of the arrangement including lease term, anticipated renewals and the applicable discount rate.

The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate.

Retirement benefit obligations and assets

The Company's retirement benefit obligations and assets are subject to a number of assumptions including discount/interest rates as applicable, inflation, salary growth and mortality rate. Significant assumptions are required when setting these criteria and a change in these assumptions would have a significant impact on the amount recorded in the Company's balance sheet and the statement of profit and loss. The Company sets these assumptions based on previous experience and third party actuarial advice. The assumptions are reviewed annually and adjusted following actuarial and experience changes. Further details on the Company's retirement benefit obligations and assets, including key assumptions are set out in note 33, page F94.

(d) Business combination under common control

Business combinations involving entities or businesses under common control are accounted for using the pooling of interest method. Under pooling of interest method, the assets and liabilities of the combining entities or businesses are reflected at their carrying amounts after making adjustments necessary to harmonise the accounting policies. The financial information in the financial statements in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceding period in the

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

financial statements, irrespective of the actual date of the combination. The identity of the reserves is preserved in the same form in which they appeared in the financial statements of the transferor and the difference, if any, between the amount recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve.

(e) Property, plant and equipment

Property, plant and equipment is stated at cost or deemed cost applied on transition to Ind AS, less accumulated depreciation and impairment. Cost includes all direct costs and expenditures incurred to bring the asset to its working condition and location for its intended use. Trial run expenses are capitalised. Borrowing costs incurred during the period of construction is capitalised as part of cost of qualifying asset.

Depreciation is provided so as to write off, on a straight line basis, the cost/deemed cost of property, plant and equipment to their residual value. These charges are commenced from the dates the assets are available for their intended use and are spread over their estimated useful lives. The estimated useful lives of assets, residual values and depreciation method are reviewed regularly and revised when necessary.

Depreciation on assets under construction commences only when the assets are ready for their intended use.

The estimated useful lives for the main categories of property, plant and equipment are:

	Estimated useful life (years)
Freehold buildings	upto 60 years*
Roads	5 to 10 years*
Plant and machinery	upto 40 years*
Furniture, fixture and office equipment	3 to 10 years*
Vehicles and aircraft	5 to 20 years*
Railway sidings	upto 35 years*
Assets covered under the Electricity Act (life as prescribed under the Electricity Act)	3 to 38 years

Property, plant and equipment are evaluated for recoverability wherever there is any indication that their carrying value may not be recoverable. If any such indication exists, the recoverable amount being the higher of fair value less costs to sell and value in use is determined on an individual asset basis. In cases where the asset does not generate cash flows that are largely independent from other assets, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. In assessing value in use, the estimated future cash flows are discounted to their present value using a tax free discount rate that reflects current market assessment of the time value of money and the risk specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable value of an asset (CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (CGU) is reduced to its recoverable value. An impairment loss is recognised in the statement of profit and loss.

Major furnace relining expenses are depreciated over a period of 10 years (average expected life).

Freehold land is not depreciated.

* For these class of assets, based on internal assessment and independent technical evaluation carried out by chartered engineers, the Company believes that the useful lives as given above best represent the period over which the Company expects to use these assets. Hence the useful lives for these assets are different from the useful lives as prescribed under Part C of Schedule II of the Companies Act, 2013.

(f) Exploration for and evaluation of mineral resources

Expenditures associated with search for specific mineral resources are recognised as exploration and evaluation assets. The following expenditure comprises cost of exploration and evaluation assets:

- › obtaining of the rights to explore and evaluate mineral reserves and resources including costs directly related to this acquisition
- › researching and analysing existing exploration data

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

- › conducting geological studies, exploratory drilling and sampling
- › examining and testing extraction and treatment methods
- › compiling pre-feasibility and feasibility studies
- › activities in relation to evaluating the technical feasibility and commercial viability of extracting a mineral resource.

Administration and other overhead costs are charged to the cost of exploration and evaluation assets only if directly related to an exploration and evaluation project.

If a project does not prove viable, all irrecoverable exploration and evaluation expenditure associated with the project net of any related impairment allowances is written off to the statement of profit and loss.

The Company measures its exploration and evaluation assets at cost and classifies as property, plant and equipment or intangible assets according to the nature of the assets acquired and applies the classification consistently. To the extent that a tangible asset is consumed in developing an intangible asset, the amount reflecting that consumption is capitalised as a part of the cost of the intangible asset.

As the capitalised exploration asset is not available for use, it is not depreciated. All exploration and evaluation assets are monitored for indications of impairment. An exploration and evaluation asset is no longer classified as such when the technical feasibility and commercial viability of extracting a mineral resource are demonstrable and the development of the deposit is sanctioned by the management. The carrying value of such exploration and evaluation asset is reclassified to mining assets.

(g) Development expenditure for mineral reserves

Development is the establishment of access to mineral reserves and other preparations for commercial production. Development activities often continue during production and include:

- › sinking shafts and underground drifts (often called mine development)
- › making permanent excavations
- › developing passageways and rooms or galleries
- › building roads and tunnels and
- › advance removal of overburden and waste rock.

Development (or construction) also includes the installation of infrastructure (e.g., roads, utilities and housing), machinery, equipment and facilities.

Development expenditure is capitalised and presented as part of mining assets. No depreciation is charged on the development expenditure before the start of commercial production.

(h) Provision for restoration and environmental costs

The Company has liabilities related to restoration of soil and other related works, which are due upon the closure of certain of its mining sites.

Such liabilities are estimated case-by-case based on available information, considering applicable local legal requirements. The estimation is made using existing technology, at current prices, and discounted using an appropriate discount rate where the effect of time value of money is material. Future restoration and environmental costs, discounted to net present value, are capitalised and the corresponding restoration liability is raised as soon as the obligation to incur such costs arises. Future restoration and environmental costs are capitalised in property, plant and equipment or mining assets as appropriate and are depreciated over the life of the related asset. The effect of time value of money on the restoration and environmental costs liability is recognised in the statement of profit and loss.

(i) Stripping Costs

The Company separates two different types of stripping costs that are incurred in surface mining activity:

- › developmental stripping costs and
- › production stripping costs

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

Developmental stripping costs which are incurred in order to obtain access to quantities of mineral reserves that will be mined in future periods are capitalised as part of mining assets.

Capitalisation of developmental stripping costs ends when the commercial production of the mineral reserves begins. A mine can operate several open pits that are regarded as separate operations for the purpose of mine planning and production. In this case, stripping costs are accounted for separately, by reference to the ore extracted from each separate pit. If, however, the pits are highly integrated for the purpose of mine planning and production, stripping costs are aggregated too.

The determination of whether multiple pit mines are considered separate or integrated operations depends on each mine's specific circumstances. The following factors normally point towards the stripping costs for the individual pits being accounted for separately:

- › mining of the second and subsequent pits is conducted consecutively with that of the first pit, rather than concurrently
- › separate investment decisions are made to develop each pit, rather than a single investment decision being made at the outset
- › the pits are operated as separate units in terms of mine planning and the sequencing of overburden and ore mining, rather than as an integrated unit
- › expenditures for additional infrastructure to support the second and subsequent pits are relatively large
- › the pits extract ore from separate and distinct ore bodies, rather than from a single ore body.

The relative importance of each factor is considered by the management to determine whether, the stripping costs should be attributed to the individual pit or to the combined output from the several pits.

Production stripping costs are incurred to extract the ore in the form of inventories and/or to improve access to an additional component of an ore body or deeper levels of material. Production stripping costs are accounted for as inventories to the extent the benefit from production stripping activity is realised in the form of inventories.

The Company recognises a stripping activity asset in the production phase if, and only if, all of the following are met:

- › it is probable that the future economic benefit (improved access to the ore body) associated with the stripping activity will flow to the Company
- › the Company can identify the component of the ore body for which access has been improved and
- › the costs relating to the improved access to that component can be measured reliably.

Such costs are presented within mining assets. After initial recognition, stripping activity assets are carried at cost/deemed cost, less accumulated amortisation and impairment. The expected useful life of the identified component of the ore body is used to depreciate or amortise the stripping asset.

(j) Intangible assets

Software costs and other intangible assets are included in the balance sheet as intangible assets when it is probable that associated future economic benefits would flow to the Company. In this case they are measured initially at purchase cost and then amortised on a straight-line basis over their estimated useful lives.

	Estimated useful life (years)
Computer software	3 to 5 years

Subsequent to initial recognition, intangible assets with definite useful lives are reported at cost or deemed cost applied on transition to Ind AS, less accumulated amortisation and accumulated impairment losses.

Intangible assets are evaluated for recoverability wherever there is any indication that their carrying value may not be recoverable. If any such indication exists, the recoverable amount being the higher of fair value less costs to sell and value in use is determined on an individual asset basis. In cases, where the asset does not generate cash flows that are largely independent from other assets, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable value of an asset (CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (CGU) is reduced to its recoverable value. An impairment loss is recognised in the statement of profit and loss.

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

Mining assets are amortised over the useful life of the mine or lease period whichever is lower. For certain mining assets, where unit of production is considered to be more reflective of the pattern of use, amortisation is done based on unit of production method.

(k) Leases

The Company determines whether an arrangement contains a lease by assessing whether the fulfilment of a transaction is dependent on the use of a specific asset and whether the transaction conveys the right to control the use of that asset to the Company in return for payment.

The Company as lessee

The Company accounts for each lease component within the contract separately from non-lease components and allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception comprises of the amount of initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date.

Certain lease arrangements include options to extend or terminate the lease before the end of the lease term. The right-of-use assets and lease liabilities include these options when it is reasonably certain that such options would be exercised.

The right-of-use assets are subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any, and adjusted for any re-measurement of the lease liability. The right-of-use assets are depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

Lease liability is measured at the present value of the lease payments that are not paid at the commencement

date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications. The Company recognises the amount of the re-measurement of lease liability as an adjustment to the right-of-use asset. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognises any remaining amount of the re-measurement in the statement of profit and loss.

Variable lease payments not included in the measurement of the lease liabilities are expensed to the statement of profit and loss in the period in which the events or conditions which trigger those payments occur.

Payment made towards leases for which non-cancellable term is 12 months or lesser (short-term leases) and low value leases are recognised in the statement of Profit and Loss as rental expenses over the tenure of such leases.

The Company as lessor

(i) **Operating lease** – Rental income from operating leases is recognised in the statement of profit and loss on a straight-line basis over the term of the relevant lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset is diminished. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying value of the leased asset and recognised on a straight-line basis over the lease term.

(ii) **Finance lease** – When assets are leased out under a finance lease, the present value of minimum lease payments is recognised as a receivable. The difference between the gross receivable and the present value of receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method before tax, which reflects a constant periodic rate of return. Such rate is the interest rate which is implicit in the lease contract.

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

(l) Investments in subsidiaries, associates and joint ventures

The Company measures its equity investments in subsidiaries in the standalone financial statements at fair value through other comprehensive income as per Ind AS 109 "Financial instruments" with changes in fair value of such investments being recognised through "Other Comprehensive Income (OCI)" as on each reporting date.

Investments in associates and joint ventures are carried at cost/deemed cost applied on transition to Ind AS, less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of investment is assessed and an impairment provision is recognised, if required, immediately to its recoverable amount, being the higher of value in use or fair value less costs to sell. On disposal of such investments, difference between the net disposal proceeds and carrying amount is recognised in the statement of profit and loss.

(m) Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit and loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. The transaction costs directly attributable to the acquisition of financial assets and financial liabilities at fair value through profit and loss are immediately recognised in the statement of profit and loss. Trade receivables that do not contain a significant financing component are measured at transaction price.

(l) Financial assets

Cash and bank balances

Cash and bank balances consist of:

- (i) **Cash and cash equivalents** - which includes cash in hand, deposits held at call with banks and other short-term deposits which are readily

convertible into known amounts of cash, are subject to an insignificant risk of change in value and have original maturities of less than three months. These balances with banks are unrestricted for withdrawal and usage.

- (ii) **Other balances with banks** - which also include balances and deposits with banks that are restricted for withdrawal and usage.

Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at fair value

Financial assets are measured at fair value through other comprehensive income if such financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and to sell such financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Company in respect of certain equity investments (other than in associates and joint ventures) which are not held for trading has made an irrevocable election to present in other comprehensive income subsequent changes in the fair value of such equity instruments. Such an election is made by the Company on an instrument-by-instrument basis at the time of initial recognition of such equity investments. These investments are held for medium or long-term strategic purpose. The Company has chosen to designate these investments in equity instruments as fair value through other comprehensive income as the management believes this provides a more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in the statement of profit and loss.

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

Financial assets not measured at amortised cost or at fair value through other comprehensive income are carried at fair value through profit and loss.

Interest income

Interest income is accrued on a time proportion basis, by reference to the principal outstanding and effective interest rate applicable and is recognised in the statement of profit and loss.

Dividend income

Dividend income from investments is recognised in the statement of profit or loss when the right to receive payment has been established.

Impairment of financial assets

Loss allowance for expected credit losses is recognised for financial assets measured at amortised cost and fair value through other comprehensive income.

The Company recognises lifetime expected credit losses for all trade receivables that do not constitute a financing transaction.

For financial assets (apart from trade receivables that do not constitute of financing transaction) whose credit risk has not significantly increased since initial recognition, loss allowance equal to twelve months expected credit losses is recognised. Loss allowance equal to the lifetime expected credit losses is recognised if the credit risk of the financial asset has significantly increased since initial recognition.

De-recognition of financial assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the assets and an associated liability for amounts it may have to pay.

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a borrowing for the proceeds received.

(II) Financial liabilities and equity instruments

Classification as debt or equity

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

Financial liabilities

Trade and other payables are initially measured at fair value, net of transaction costs, and are subsequently measured at amortised cost, using the effective interest rate method where the time value of money is significant.

Interest bearing bank loans, overdrafts and issued debt are initially measured at fair value and are subsequently measured at amortised cost using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in the statement of profit and loss.

De-recognition of financial liabilities

The Company de-recognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire.

Derivative financial instruments and hedge accounting

In the ordinary course of business, the Company uses certain derivative financial instruments to reduce business risks which arise from its exposure

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

to foreign exchange, base metal prices and interest rate fluctuations. The instruments are confined principally to forward foreign exchange contracts, forward rate agreements, cross currency swaps, interest rate swaps and collars. The instruments are employed as hedges of transactions included in the financial statements or for highly probable forecast transactions/firm contractual commitments. These derivatives contracts do not generally extend beyond six months, except for certain currency swaps and interest rate derivatives.

Derivatives are initially accounted for and measured at fair value on the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period.

The Company adopts hedge accounting for forward foreign exchange, interest rate and commodity contracts wherever possible. At the inception of each hedge, there is a formal, documented designation of the hedging relationship. This documentation includes, inter alia, items such as identification of the hedged item and transaction and nature of the risk being hedged. At inception each hedge is expected to be highly effective in achieving an offset of changes in fair value or cash flows attributable to the hedged risk. The effectiveness of hedge instruments to reduce the risk associated with the exposure being hedged is assessed and measured at the inception and on an ongoing basis. The ineffective portion of designated hedges is recognised immediately in the statement of profit and loss.

When hedge accounting is applied:

- › for fair value hedges of recognised assets and liabilities, changes in fair value of the hedged assets and liabilities attributable to the risk being hedged, are recognised in the statement of profit and loss and compensate for the effective portion of symmetrical changes in the fair value of the derivatives.
- › for cash flow hedges, the effective portion of the change in the fair value of the derivative is

recognised directly in other comprehensive income and the ineffective portion is recognised in the statement of profit and loss. If the cash flow hedge of a firm commitment or forecasted transaction results in the recognition of a non-financial asset or liability, then, at the time the asset or liability is recognised, the associated gains or losses on the derivative that had previously been recognised in equity are included in the initial measurement of the asset or liability. For hedges that do not result in the recognition of a non-financial asset or a liability, amounts deferred in equity are recognised in the statement of profit and loss in the same period in which the hedged item affects the statement of profit and loss.

In cases where hedge accounting is not applied, changes in the fair value of derivatives are recognised in the statement of profit and loss as and when they arise.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time, any cumulative gain or loss on the hedging instrument recognised in equity is retained in equity until the forecasted transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred to the statement of profit and loss.

Further details on the Company's financial instruments are set out in note 37, page F110.

(n) Employee benefits

Defined contribution plans

Contributions under defined contribution plans are recognised as expense for the period in which the employee has rendered service. Payments made to state managed retirement benefit schemes are dealt with as payments to defined contribution schemes where the Company's obligations under the schemes are equivalent to those arising in a defined contribution retirement benefit scheme.

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

Defined benefit plans

For defined benefit retirement schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuation being carried out at each year-end balance sheet date. Re-measurement gains and losses of the net defined benefit liability/(asset) are recognised immediately in other comprehensive income. The service cost and net interest on the net defined benefit liability/(asset) are recognised as an expense within employee costs.

Past service cost is recognised as an expense when the plan amendment or curtailment occurs or when any related restructuring costs or termination benefits are recognised, whichever is earlier.

The retirement benefit obligations recognised in the balance sheet represents the present value of the defined benefit obligations as reduced by the fair value of plan assets.

Compensated absences

Liabilities recognised in respect of other long-term employee benefits such as annual leave and sick leave are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date using the projected unit credit method with actuarial valuation being carried out at each year-end balance sheet date. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to the statement of profit and loss in the period in which they arise.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised based on actuarial valuation.

(o) Inventories

Inventories comprise the followings:

- a) Raw materials,
- b) Work-in-progress,
- c) Finished and semi-finished goods,

d) Stock-in-trade, and

e) Stores and spares.

Inventories are recorded at the lower of cost and net realisable value. Cost is ascertained on a weighted average basis. Costs comprise direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Net realisable value is the price at which the inventories can be realised in the normal course of business after allowing for the cost of conversion from their existing state to a finished condition and for the cost of marketing, selling and distribution.

Provisions are made to cover slow moving and obsolete items based on historical experience of utilisation on a product category basis, which involves individual businesses considering their product lines and market conditions.

(p) Provisions

Provisions are recognised in the balance sheet when the Company has a present obligation (legal or constructive) as a result of a past event, which is expected to result in an outflow of resources embodying economic benefits which can be reliably estimated. They also include provisions on decommissioning, site restoration and environmental provisions as well. Each provision is based on the best estimate of the expenditure required to settle the present obligation at the balance sheet date. Where the time value of money is material, provisions are measured on a discounted basis.

Constructive obligation is an obligation that derives from an entity's actions where:

- (i) by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and
- (ii) as a result, the entity has created a valid expectation on the part of those other parties that it will discharge such responsibilities.

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

(q) Onerous contracts

A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

(r) Government grants

Government grants are recognised at its fair value, where there is a reasonable assurance that such grants will be received and compliance with the conditions attached therewith have been met.

Government grants related to expenditure on property, plant and equipment are credited to the statement of profit and loss over the useful lives of qualifying assets or other systematic basis representative of the pattern of fulfilment of obligations associated with the grant received. Grants received less amounts credited to the statement of profit and loss at the reporting date are included in the balance sheet as deferred income.

(s) Income taxes

Tax expense for the year comprises of current and deferred tax. The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the statement of profit and loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates and tax laws that have been enacted or substantively enacted in countries where the Company and its subsidiaries operate by the end of the reporting period.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying value of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences. In

contrast, deferred tax assets are only recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Deferred tax liabilities are recognised on taxable temporary differences arising on investments in subsidiaries, joint ventures and associates, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying value of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on the tax rates and tax laws that have been enacted or substantially enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying value of its assets and liabilities.

Deferred tax assets and liabilities are offset to the extent that they relate to taxes levied by the same tax authority and there are legally enforceable rights to set off current tax assets and current tax liabilities within that jurisdiction.

Current and deferred tax are recognised as an expense or income in the statement of profit and loss, except when they relate to items credited or debited either in other comprehensive income or directly in equity, in which case the tax is also recognised in other comprehensive income or directly in equity.

(t) Revenue

The Company manufactures and sells a range of steel and other products.

Sale of products

Revenue from sale of products is recognised when control of the products has transferred, being when the products are delivered to the customer. Delivery occurs when the products have been shipped or delivered to the

NOTES

forming part of the standalone financial statements

2. Material accounting policies (Contd.)

specific location as the case may be, the risks of loss has been transferred, and either the customer has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied. Sale of products include related ancillary services, if any.

Goods are often sold with volume and price discounts based on aggregate sales over a 12 months period. Revenue from these sales is recognised based on the price specified in the contract, net of the estimated volume and price discounts. Accumulated experience is used to estimate and provide for the discounts, using the most likely method, and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. A liability is recognised for expected volume discounts and price discounts payable to customers in relation to sales made until the end of the reporting period. No element of financing is deemed present as the sales are generally made with a credit term of 30-90 days, which is consistent with market practice. Any obligation to provide a refund is recognised as refund liability. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

The Company does not adjust the transaction prices for any time value of money in case of contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer does not exceed one year.

Sale of power and water

Revenue from sale of power and water is recognised when the services are provided to the customer based on approved tariff rates established by the respective regulatory authorities. The Company doesn't recognise revenue and an asset for cost incurred in the past that will be recovered.

(u) Foreign currency transactions and translations

The financial statements of the Company are presented in Indian Rupee ("₹"), which is the functional currency of the Company and the presentation currency for the financial statements.

In preparing the financial statements, transactions in currencies other than the entity's functional currency are recorded at the rates of exchange prevailing on the date of the transaction. At the end of each reporting period, monetary items denominated in foreign currencies are re-translated at the rates prevailing at the end of the reporting period. Non-monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences arising on the re-translation or settlement of other monetary items are included in the statement of profit and loss for the period.

(v) Recent Accounting Pronouncements

Ministry of Corporate Affairs ("MCA") has notified amendments to the existing standards Ind AS 1 – Presentation of financial statements relating to classification of liabilities as current or non-current subject to covenants, Ind AS 12 – Income Taxes relating to international tax reforms – Pillar Two Model Rules, Ind AS 21 – the effect of changes in foreign exchange rates and Ind AS 107 – Financial Instruments: Disclosures and Ind AS 7 - Statement of Cashflows relating to disclosure of supplier financing arrangements, applicable from April 1, 2025. The Company has assessed that there is no significant impact on its financial statements with respect to the amendments in Ind AS 1, Ind AS 21 and Ind AS 12. The Company has evaluated and provided disclosure with respect to supplier financing arrangement in note 23, page F87.

Total	28,011.55	3,540.66	1029.53	13.15

The Company in the earlier years had prioritised its strategic objective of deleveraging balance sheet over the planned investments in organic growth projects which resulted in lower capital expenditure on projects as compared to the original plan as approved by the Board of Directors of the Company.

Following the rebalancing of capital structure and the Company attaining an investment grade credit rating, the capital allocation for organic growth projects has been increased and the Company expects to commission these facilities in line with revised completion schedules.

- (i) Vehicle cost used for in-house research and development included within right-of-use vehicles is ₹4.26 crore (March 31, 2025: ₹4.23 crore).
- (ii) The Company's significant leasing arrangements include assets dedicated for use under long-term arrangements, lease of land, office space, equipment, vehicles and some IT equipment.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. Each lease generally imposes a restriction that, unless there is a contractual right for the Company to sublet the asset to another party, the right-of-use asset can only be used by the Company. Extension and termination options are included in some property and equipment leases. These are used to maximise operational flexibility in terms of managing the assets used in the Company's operations. Majority of the extension and termination options held are exercisable based on mutual agreement of the Company and the lessors.

With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. Payments made for short-term leases and leases of low-value are expensed on a straight-line basis over the lease term.

Variable lease payments which do not depend on an index or a rate (such as lease payments based on a percentage of sales) are excluded from the initial measurement of the lease liability and asset.

For leases recognised under long-term arrangements involving use of a dedicated asset, non-lease components are excluded based on the underlying contractual terms and conditions. A change in the allocation assumptions may have an impact on the measurement of lease liabilities and the related right-of-use assets.

During the year ended March 31, 2026, the Company has recognised the following in the statement of profit and loss:

- expense in respect of short-term leases and leases of low-value assets ₹15.19 crore (2024-25: ₹17.88 crore) and ₹1.73 crore (2024-25: ₹1.58 crore) respectively.
- expense in respect of variable lease payments not included in the measurement of lease liabilities ₹60.02 crore (2024-25: ₹71.72 crore).
- income in respect of sub-leases of right-of-use assets ₹0.20 crore (March 31, 2025: ₹0.24 crore).

NOTES

forming part of the standalone financial statements

4. Right-of-use assets (Contd.)

[Item No. I(c), Page F24]

During the year ended March 31, 2026, total cash outflow in respect of leases amounted to **₹856.60** crore (2024-25: ₹963.42 crore).

During the year ended March 31, 2026, the Company has sold an Air Separation Unit for a consideration of **₹575.00** crore. Simultaneously, the Company has entered into a lease arrangement with respect to such Air Separation Unit. No gain/loss has been recorded in respect of such sale and leaseback transaction.

iii) Lease deeds of all right-of-use assets are held in the name of the Company (including erstwhile name), except for the following:

Description of property	Gross carrying value (₹ crore)	Held in the name of	Whether promoter, director or their relative or employee	Period held (i.e. dates of capitalisation provided in the range)*	Reason for not being held in the name of the Company

		56.22	33.14	
		94,528.54	72,699.01	

* These investments are carried at a book value of ₹1.00

As on March 31, 2026, Kumardhubi Fireclay and Silica Works Ltd., Kumardhubi Metal Casting and Engineering Ltd., Tata Construction and Projects Limited and Andar East Coal Company Private Limited are under liquidation.

@ Equity investment in TRF Limited includes ₹5.79 crore for 37,53,275 equity shares and deemed equity component in respect of NCRPS issued by TRF.

\$ Cost of unquoted equity instruments has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range.

^ The Company has restricted access to returns associated with its ownership interest in the investment.

- (i) The Company holds more than 50% of the equity share capital in TM International Logistics Limited. However, decisions in respect of activities which significantly affect the risks and rewards of these businesses, require unanimous consent of all the shareholders. This entity has therefore been considered as joint venture.
- (ii) The Hon'ble National Company Law Tribunal (NCLT), Kolkata vide order dated April 5, 2019 has admitted the initiation of Corporate Insolvency Resolution Process (CIRP) in respect of Tayo Rolls Limited, a subsidiary of the Company.
- (iii) Tata Steel Netherland ('TSN') and Tata Steel UK Limited ('TSUK'), both wholly owned subsidiaries of Tata Steel Europe Limited ('TSE'), which in turn is a wholly owned step-down subsidiary of the Company, are undertaking a transition towards de-carbonised operations and away from the current blast furnace-based production processes.

With respect to TSN, on December 19, 2024, the local Environmental Agency (EA) had sent a notice to Tata Steel Ijmuiden (TSIJ), a wholly owned subsidiary of TSN, on alleged non-compliances regarding certain aspects of the state of maintenance and continuing operation of its Coke and Gas Plant (CGP) 2 for which the EA gave TSIJ a period of 12 months to remedy the alleged non-compliances. TSN also received notices alleging non-compliance and orders under penalty based on the local EA's measurements of exceedances of emissions of substances versus certain prescribed limits for both Coke Ovens (CGP 1 and 2). The EA and the local Province of North Holland (Province) have issued a letter on April 23, 2026 to TSN, indicating their intention to revoke operating permits and trigger an early closure of CGP 1 and 2. TSN has made a detailed assessment and shared with the EA and the Province a timeline which is necessary to ensure a safe, responsible and controlled closure process. The timing, nature and contents of a decision that may be issued by the EA and the Province, is currently unclear.

NOTES

6. Investments (Contd.)

[Item No. I(g)(i) and II(b)(i), Page F24]

TSN is also exploring all options including legal recourse to ensure that the closure process is managed with due care and prudence. Given the significance of the CGP facilities to TSN's operations and the risks, challenges and uncertainties associated with the continued operations of both the CGP units, there exists a material uncertainty surrounding the impact of such adversities on the financial stability of TSN as an entity. The financial results of TSN as an entity have accordingly been prepared on a going concern basis while recognising the aforesaid material uncertainty.

On September 29, 2025, the Government of the Netherlands and the province of North Holland, the Company and TSN have agreed an intended framework for the integrated project in TSN and signed a non-binding Joint Letter of Intent ('JLoI'). The JLoI sets out the aims and objectives of the parties for the first phase of transition to low CO₂ steel production and to improve the healthy living environment around the IJmuiden site, including specific beyond legal measures to reduce the contribution of TSN's operations to potential environmental pollution. The JLoI also includes the financial and policy support required for the integrated project. TSN's transition plan considers that the policy environment in the Netherlands and EU is supportive to the European steel industry.

TSN's plans for its integrated de-carbonisation and environmental improvement project are part of the non-binding Joint Letter of Intent executed with the Government of Netherlands and Province of North Holland in September 2025.

The financial results of TSUK have also been prepared on a going concern basis, considering the UK Government funding being available under the Grant Funding Agreement (GFA) signed with the UK Government and a commitment to infuse equity into TSUK by the Company.

Considering the above, the fair value of investments held by the Company in T Steel Holdings Pte. Ltd. ('TSH'), a wholly owned subsidiary of the Company is largely dependent on the operational and financial performance of TSE which in turn primarily derives its value based on fair value models for the TSUK and TSN businesses. The fair value computation uses cash flow forecasts based not only on the most recent financial budgets, but more importantly strategic forecasts and future projections taking the analysis on sustainable cash flow reflecting average steel industry conditions (between cyclical peaks and troughs of profitability) out into perpetuity based on a steady state. If any of the key assumptions change, the fair value of the relevant business would increase/decrease and that could lead to change in the carrying amount of investments in TSH. Key assumptions for the fair value model relate to expected changes to selling prices and raw material & conversion costs, EU steel demand, energy costs, transformation programme with improvement initiatives/cost rationalisation (including employee cost), exchange rates, the amount of capital expenditure needed for decarbonisation, changes to EBITDA resulting from producing and selling steel with low embedded CO₂ emissions, levels of government support for decarbonisation, phasing of decommissioning of legacy assets as well as the commissioning of new low CO₂ production facilities, tariff regimes and discount rates. The projections are based on both the past performance and the expectations of future performance assumptions therein. The Company estimates discount rates using post-tax rates that reflect the current market rates adjusted to reflect the way the European Union steel market would assess the specific risk. The weighted average post-tax discount rates used for discounting the cash flows projections is in the range of **8.15% - 9.94%** (March 31, 2025: 8.20% to 9.56%). Beyond the specifically forecasted period, a growth rate in the range of **Nil - 2.00%** (March 31, 2025: Nil - 2.00%) is used to extrapolate the cash flow projections. This rate does not exceed the average long-term growth rate for the relevant markets.

The Company has conducted sensitivity analysis on the fair value including sensitivity in respect of discount rates. An increase/decrease of 25 basis points in discount rate would result in an decrease/increase in fair value of investments in TSH by **₹3,921.00 crore** (March 31, 2025: ₹4,120.00 crore) and **₹4,118.00 crore** (March 31, 2025: ₹4,464.00 crore) respectively.

Based on the above fair value assessment of its investments held in TSH, the Company has recognised a fair value loss through Other Comprehensive Income of **₹4,369.59 crore** during the year ended March 31, 2026 in the standalone financial statements. (2024-25: loss ₹24,870.00 crore).

6. Investments (Contd.)

[Item No. I(g)(i) and II(b)(i), Page F24]

- (iv) The Company, through erstwhile Tata Steel Long Products Limited ("TSLP") now merged with the Company, on July 4, 2022, completed the acquisition of Neelachal Ispat Nigam Limited ("NINL").

The fair value of equity exposure in NINL has been assessed using cash flow forecasts based on the most recently approved business plan for financial year 2026-27. Beyond financial year 2026-27, the cash flow forecasts is based on strategic forecasts which cover a period of nine years and future projections taking the analysis out to perpetuity. It also includes capital expenditure for capacity expansion of steel making facilities from the current 1.10 MTPA to 5.90 MTPA by financial year 2031-32 as well as estimated EBITDA changes due to implementation of the expansion strategy and operating the assets.

Key assumptions to the cash flow model are changes to selling prices and raw material costs, steel demand, amount of capital expenditure needed for expansion of the existing facilities, EBITDA and post-tax discount rate of **12.50%** (March 31, 2025: 13.00%). The estimates are based on management's best estimate of implementing the expansion strategy.

For the cash flow model, a terminal growth rate of **4.00%** (March 31, 2025: 4.00%) has been used to extrapolate the cash flows beyond the specifically forecasted period.

The outcome of the fair value assessment for equity investments held in NINL has resulted in a fair value gain through other comprehensive income of **₹400.65** crore during the year ended March 31, 2026 (2024-25: ₹1,026.98 crore).

The management has conducted sensitivity analysis including sensitivity in respect of discount rates, on the fair value assessment of the carrying value of investments held in NINL. An increase/decrease of 25 basis points in the discount rate would result in an decrease/increase in fair value of investments by **₹1,226.00** crore (March 31, 2025: ₹912.00 crore) and **₹1,302.00** crore (March 31, 2025: ₹970.00 crore) respectively.

- (v) The fair value of equity exposure in Tata Steel Downstream Products Limited (TSDPL) has been assessed using discounted cash flow forecasts. Key assumptions to the cash flow model are EBITDA and post-tax discount rate of **13.90%** (March 31, 2025: 14.00%). For the cash flow model, a terminal growth rate of **4.00%** (March 31, 2025: 3.00%) has been used to extrapolate the cash flows beyond the specifically forecasted period.

The outcome of the fair value assessment for equity investments held in TSDPL has resulted in a fair value gain through other comprehensive income of **₹16.46** crore during the year ended March 31, 2026 (2024-25: gain of ₹172.58 crore).

The management has conducted sensitivity analysis including sensitivity in respect of discount rates, on the fair value assessment of the carrying value of investments held in TSDPL and that results in no significantly different estimate of fair value.

- (vi) The fair value of equity exposure in Tata Steel Utilities and Infrastructure Services Limited (TSUISL) has been assessed using discounted cash flow forecasts. Key assumptions to the cash flow model are EBITDA and post-tax discount rate of **14.30%** (March 31, 2025: 15.00%). For the cash flow model, a terminal growth rate of **4.00%** (March 31, 2025: 4.00%) has been used to extrapolate the cash flows beyond the specifically forecasted period.

The outcome of the fair value assessment for equity investments held in TSUISL has resulted in a fair value gain through other comprehensive income of **₹813.83** crore during the year ended March 31, 2026 (2024-25: gain of ₹75.77 crore).

The management has conducted sensitivity analysis including sensitivity in respect of discount rates, on the fair value assessment of the carrying value of investments held in TSUISL and that results in no significantly different estimate of fair value.

The Company believes that key assumptions which have been used to undertake the valuation for the above investments referred in note (iii) to (vi) in its balance sheet as of March 31, 2026, represent the best view of the future economic landscape and operating model at this time. Going forward, the key assumptions would be kept under review and relevant changes, if any, will be reflected in the financial statements from time to time.

8. Other financial assets (Contd.)

[Item No. I(g)(iv) and II(b)(vii), Page F24]

- (ii) Non-current and current earmarked balances with banks represent deposits in escrow account. These are primarily placed as security with government bodies, margin money against issue of bank guarantees, etc.
- (iii) Current other financial assets include amount receivable from post-employment benefit funds **₹83.92** crore (March 31, 2025: ₹153.47 crore) on account of retirement benefit obligations paid by the Company directly.
- (iv) Non-current and current other financial assets include:
 - (a) lease receivable of **₹1,012.05** crore (March 31, 2025: ₹1,012.14 crore) recognised on account of long-term arrangement with a subsidiary on de-recognition of assets.
 - (b) advance paid in respect of de-allocated coal blocks of **₹487.71** crore (March 31, 2025: ₹487.71 crore) which is recoverable from the new allottee once the mine is allotted.

9. Income taxes

[Item No. IV(e), Page F24]

A. Income tax expenses/(benefit)

The Company is subject to income tax in India on the basis of its financial statements. The Company can claim tax exemptions/ deductions under specific sections of the Income Tax Act, 1961 subject to fulfilment of prescribed conditions, as may be applicable. The Company had opted for the new tax regime under Section 115BAA of the Act, which provides a domestic company with an option to pay tax at a rate of 22% (effective rate of 25.168%). The lower rate shall be applicable subject to certain conditions, including that the total income should be computed without claiming specific deduction or exemptions.

As per the tax laws, business loss can be carried forward for a maximum period of eight assessment years immediately succeeding the assessment year to which the loss pertains. Unabsorbed depreciation can be carried forward for an indefinite period.

The reconciliation of estimated income tax to income tax expense is as below:

	Year ended March 31, 2026	Year ended March 31, 2025
	(₹ crore)	
Profit/(loss) before tax	21,353.10	18,718.84
Expected income tax expense at statutory income tax rate of 25.168% (2024-25: 25.168%)	5,374.15	4,711.16
(a) Income exempt from tax/items not deductible/adjustments on account of unrecognised tax losses/ other tax benefits	13.19	115.96
(b) Adjustments in respect of earlier years	(30.57)	-
(c) Tax on income at different rates	(75.79)	(95.73)
(d) Others	6.99	17.75
Tax expense as reported	5,287.97	4,749.14

NOTES

(b) Finished and semi-finished goods	8,211.86	7,836.90
(c) Stock-in-trade	31.23	41.16
(d) Stores and spares	4,486.79	4,670.51
	23,059.16	22,933.85
Included above, goods-in-transit:[^]		
(i) Raw materials	2,312.89	1,678.11
(ii) Finished and semi-finished goods	2.83	10.04
(iii) Stores and spares	47.82	108.55
	2,363.54	1,796.70

[^]Goods-in-transit represent amount of purchased material which are in transit as on date.

- (i) Value of inventories above is stated after provisions (net of reversal) **₹259.79** crore (March 31, 2025: ₹199.50 crore) for write-downs to net realisable value and provision for slow-moving and obsolete items.
- (ii) The cost of inventories recognised as expense **₹54.37** crore (March 31, 2025: ₹17.92 crore) in respect of write-down of inventory to net realisable value.

12. Trade receivables

[Item No. II(b)(ii), Page F24]

	As at March 31, 2026	As at March 31, 2025
(a) Considered good - Unsecured	1,674.59	1,620.64
(b) Credit impaired	185.88	175.73
	1,860.47	1,796.37
Less: Allowance for credit losses	228.82	230.72
	1,631.65	1,565.65

In determining allowance for credit losses of trade receivables, the Company has used the practical expedient by computing the expected credit loss allowance based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected credit loss allowance is based on ageing of receivables and the rates used in provision matrix.

15. Equity share capital (Contd.)

[Item No. III(a), Page F24]

(vii) The rights, powers and preferences relating to each class of share capital and the qualifications, limitations and restrictions thereof are contained in the Memorandum and Articles of Association of the Company. The principal rights are as follows:

A. Ordinary Shares of ₹1 each

- (i) In respect of every Ordinary Share (whether fully paid or partly paid), voting right and dividend shall be in the same proportion as the capital paid up on such Ordinary Share bears to the total paid up Ordinary Capital of the Company.
- (ii) The dividend proposed by the Board of Directors is subject to the approval of the Shareholders in the ensuing Annual General Meeting, except in case of interim dividend.
- (iii) In the event of liquidation, the Shareholders of Ordinary Shares are eligible to receive the remaining assets of the Company after distribution of all preferential amounts, in proportion to their shareholding.

B. 'A' Ordinary Shares of ₹10 each

- (i) (a) The holders of 'A' Ordinary Shares shall be entitled to such rights of voting and/or dividend and such other rights as per the terms of the issue of such shares, provided always that:
 - › in the case where a resolution is put to vote on a poll, such differential voting entitlement (excluding fractions, if any) will be applicable to holders of 'A' Ordinary Shares.
 - › In the case where a resolution is put to vote in the meeting and is to be decided on a show of hands, the holders of 'A' Ordinary Shares shall be entitled to the same number of votes as available to holders of Ordinary Shares.
- (b) The holders of Ordinary Shares and the holders of 'A' Ordinary Shares shall vote as a single class with respect to all matters submitted for voting by shareholders of the Company and shall exercise such votes in proportion to the voting rights attached to such shares including in relation to any scheme under Sections 391 to 394 of the Companies Act, 1956.
- (ii) The holders of 'A' Ordinary Shares shall be entitled to dividend on each 'A' Ordinary Share which may be equal to or higher than the amount per Ordinary Share declared by the Board for each Ordinary Share, and as may be specified at the time of the issue. Different series of 'A' Ordinary Shares may carry different entitlements to dividend to the extent permitted under applicable law and as prescribed under the terms applicable to such issue.

C. Preference Shares

The Company has two classes of preference shares i.e. Cumulative Redeemable Preference Shares (CRPS) of ₹100 per share and Cumulative Convertible Preference Shares (CCPS) of ₹100 per share.

- (i) Such shares shall confer on the holders thereof, the right to a fixed preferential dividend from the date of allotment, at a rate as may be determined by the Board at the time of the issue, on the capital for the time being paid up or credited as paid up thereon.
- (ii) Such shares shall rank for capital and dividend (including all dividend undeclared upto the commencement of winding up) and for repayment of capital in a winding up, pari passu inter se and in priority to the Ordinary Shares of the Company, but shall not confer any further or other right to participate either in profits or assets. However, in case of CCPS, such preferential rights shall automatically cease on conversion of these shares into Ordinary Shares.
- (iii) The holders of such shares shall have the right to receive all notices of general meetings of the Company but shall not confer on the holders thereof the right to vote at any meetings of the Company save to the extent and in the manner provided in the Companies Act, 1956, or any re-enactment thereof.
- (iv) CCPS shall be converted into Ordinary Shares as per the terms, determined by the Board at the time of issue; as and when converted, such Ordinary Shares shall rank pari passu with the then existing Ordinary Shares of the Company in all respects.
